

The Multicultural project : *"E-Twinning"*

Last 12th of May, in the halls of the " Technical Institute " in Matera, the day has been carried out " interactive" of the E-Twinning project.

The event, in fact, saw the participation of Executives of 15 schools, from all over Europe and the Mediterranean Basin.

After a brief introduction, we presented the project, which was the work of a year of our students of "G.Leopardi-Torraca" in Potenza. A project done, with commitment and great participation.

In fact E-Twinning is based on the "chat", on exchanging personal information, online, on information about the family or on a specific theme, leading a message directly with the countries with which we twinned.

This project has aroused much emotion and so much fun in all boys, who participated.

The joy intense and explosive, which tried, all those who were active in this project was crowned by the success of the day in Matera.

We are sure that the 'E-Twinning" will be even more significant in the years ahead, opening the minds of young people with new skills and communication.
